1 foot is right at the point where I have to decide whether or not to shovel. I generally just smash it down with the car and beat a path to the house by walking on it. I don't see any reason to move a bunch of snow when it is not really in the way. If we can still get our cars in and out, what is the point? But a foot starts to get in our shoes.

12 inches a bit different than 18 feet!

We got about a foot of snow, which is a lot for us in one storm. The headline for the Anchorage paper is about Cordova with 18 feet of snow (according to my wife). That is a bit of snow to shovel. She heard that they called in the National Guard.

Great! I was hoping you would be there.

I heard that over Valdez way there has been a lot of snow. How does Anchorage look?

Subject: Fw: Pebble Project Environmental Baseline Studies Agency Meetings

The Pebble Limited Partnership Environmental Baseline Studies Meeting is scheduled to occur January 31 through February 3 in Anchorage, AK. Pebble has asked that the Agency provide a list of those who will be attending in person. I am planning on participating in person, as is Palmer Hough. I am unaware of other members of the assessment team who are planning on attending in person.

If you are planning on attending the Pebble environmental data meeting in Anchorage, please let Cindi Godsey and me know as soon as possible, but no later than Tuesday, January 10.

Pebble is making arrangements for those that cannot attend in person to listen in via the internet. If you are interested in attending remotely, please let me know so that we can be sure that you get the appropriate information.

Thanks.

Jeff
